

1966-75 FORD BRONCO FRONT DYNAPRO 6 BRAKE KITS

Models Covered:

- 1966-1975 Ford Bronco Dana 30/44 Drum Axle

Kit Features:

- Upgrade from Original Equipment (OE) brakes to six piston DynaPro 6 calipers.
- 11.75" diameter **Spec 37** material HD plain face rotors.
- Simple bolt-on installation with no modifications required.
- Fits most 15" and larger wheels.

Component Features:

DynaPro 6 Lug Mount Calipers

- Fully detail machined billet DP6 calipers provide positive, big brake stopping power.
- Six differential bore pistons generate big brake clamping power with balanced pad loading for even wear in all types of high demand braking applications.
- Stainless steel pistons resist corrosion while slowing the heat transfer rate from the pads to the caliper body, fluid and seals.
- The caliper's seal-in-bore design adds proven durability, keeping the fluid in and dirt out without the need for external boot seals.
- Quick-E clip pad retention pins simplify pad service without the need for caliper removal.
- Calipers are available with either black or red high-gloss, high temperature, brake fluid resistant sealed powder coat and feature Wilwood's signature logo.

DynaPro 6 Kit Assembly

Spec 37 Material 11.75" x .81" Rotors

- **Spec 37** rotors are manufactured from a proprietary iron alloy developed to withstand extreme temperatures with the highest possible degree of resistance against distortion, warping, cracking, and wear.
- **HD** plain face rotors are precision machined for smoother engagement and provide long service life, superior thermal stability and improved fatigue resistance.

Forged Aluminum GT Mounting Hats

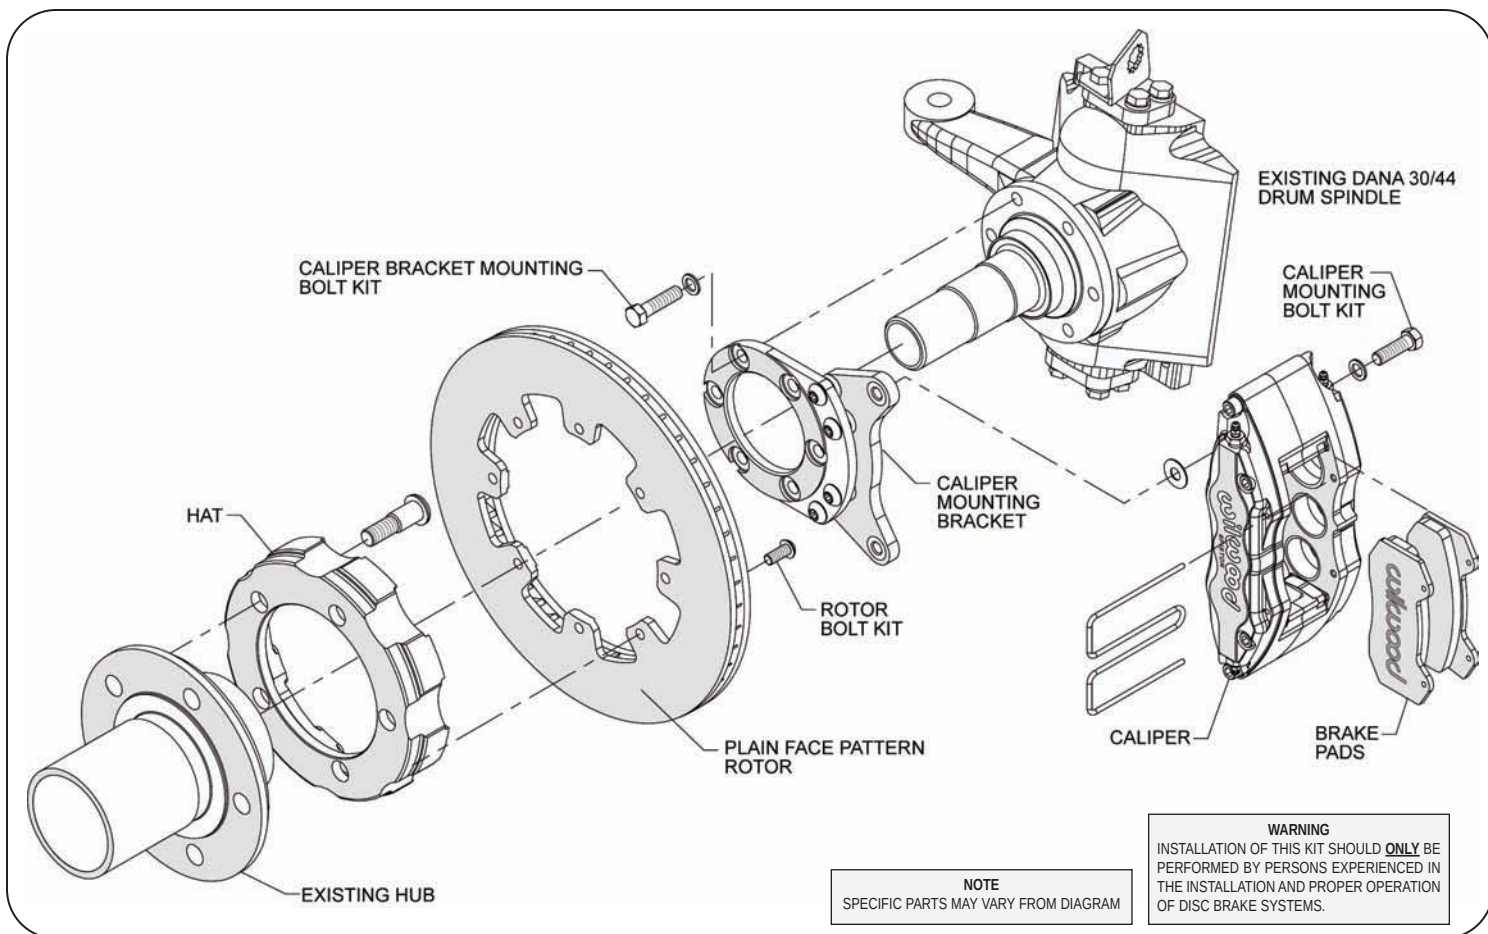

- 5 x 5.50" B.C. pattern fits directly on OE axles with .50" wheel studs
- Forged aluminum rotor mounting hats help reduce weight with the strength to handle the exceptional brake torque delivered by the calipers.
- Black E-coat finish resists corrosion while adding to the aggressive competition look inside the wheel.

Wilwood "Smart Pads"

- Kits include our proven formula BP-10 Smart Pads. BP-10 is a unique composite-metallic compound that provides increased friction, stopping power, and higher fade resistance in a clean and quiet-running, low-dust style pad.
- Optional high-temperature and race-only pad compounds are also available.

Hardware and Plumbing

- Caliper brackets, premium grade hardware, and detailed installation instructions are included in every kit.
- Jacketed stainless steel braided, DOT approved flexlines are included.
