

FORD MUSTANG • 2015-PRESENT DYNAPRO 4R • DRAG RACE FRONT BRAKE KITS

DynaPro 4R Drag Race Brake kits

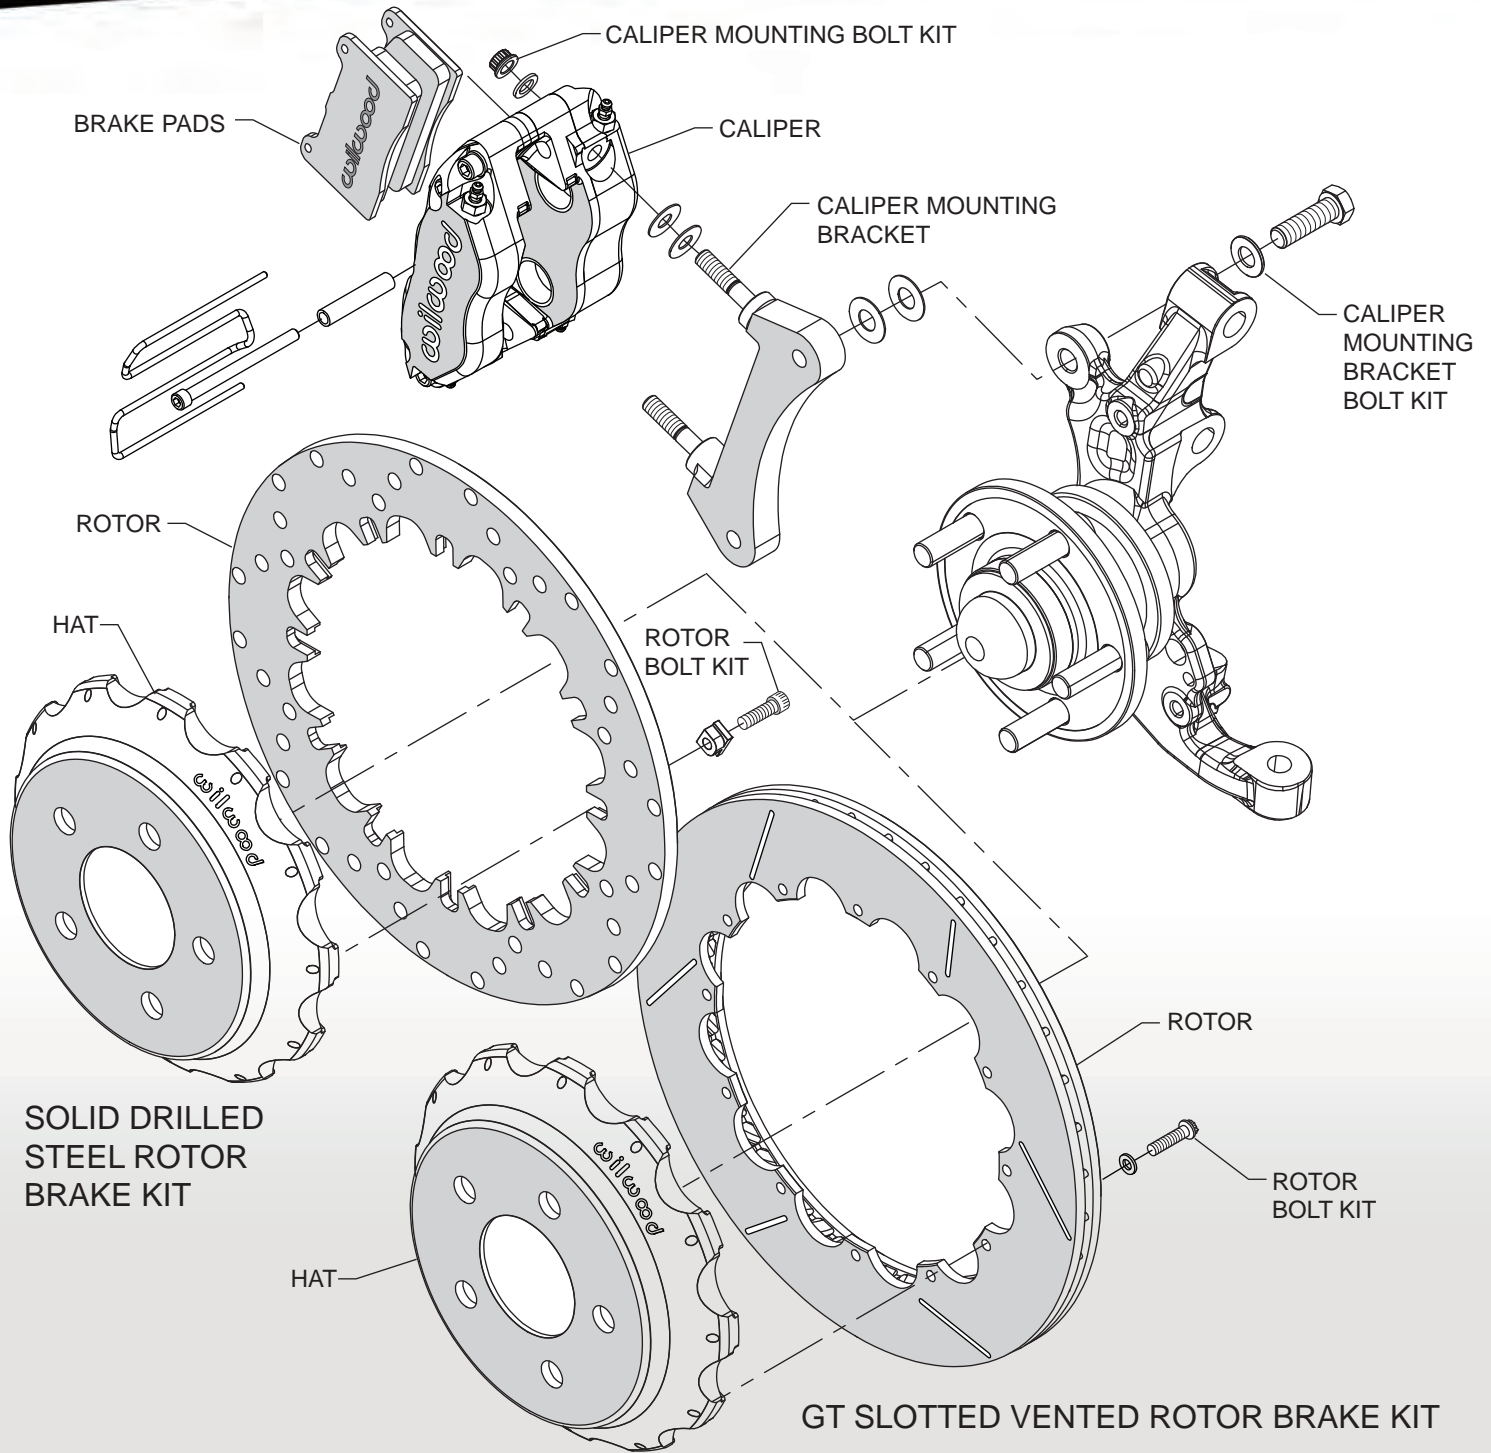

deliver high-torque stopping power with a substantial weight savings over the OE brake components. Choices for drilled steel or vented iron rotors cover all strip-only and street/strip applications.

Kit Features

- DynaPro four piston radial mount calipers and brackets mount directly to the OE spindle
- Dynamic mount drilled steel rotors maximize weight savings and resistance against thermal stress and rotor distortion on dedicated track cars
- GT-48 series directional vane vented iron rotors provide optimized thermal stability for all dual-purpose street- and strip-prepared cars
- Lightweight forged aluminum hats with high strength stainless bolts mount the rotors to the OE hubs
- High-response, fade-resistant BP-20 compound *SmartPads*
- All premium-grade, high-strength fasteners and hardware
- Braided stainless steel DOT-type flexlines available separately for a complete custom installation

ORDERING INFORMATION: Front Drag Kits for 2015-Present Ford Mustangs with 17" Wheels

PART NUMBER	DESCRIPTION	CALIPER FINISH
140-14100-D	DynaPro 4R Calipers, 12.90" Diameter x .38" Thick Dynamic Mount Drilled Steel Rotors	Black Anodize
140-14103	DynaPro 4R Calipers, 12.88" Diameter x .81" Thick GT-48 Directional Vane Vented Iron Rotor	Black Anodize
220-13912	Flexline Kit, Braided Stainless Steel with Protective Overlay and DOT Compliant Couplings	N/A
