

FORD MUSTANG • 2015-PRESENT DYNAPRO 4R • DRAG RACE REAR BRAKE KIT

DynaPro 4R Drag Race Brake kits

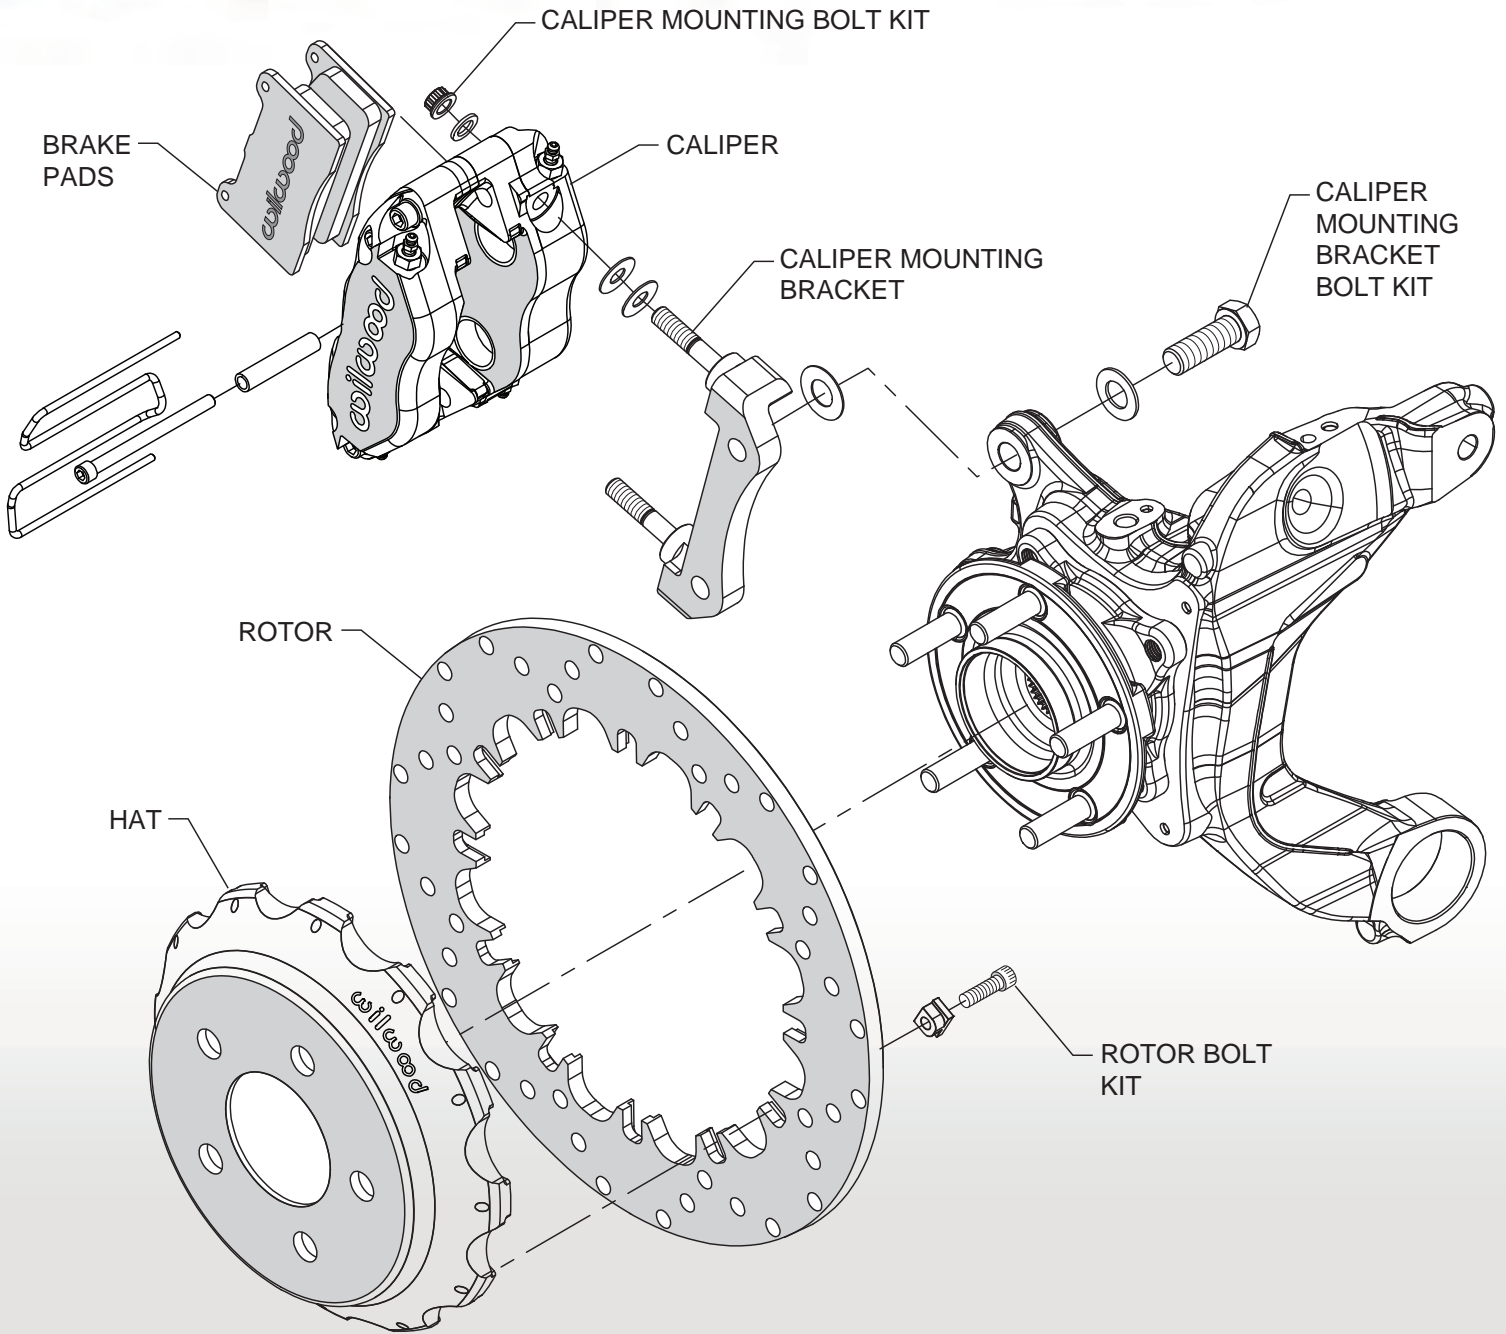

deliver high-torque stopping power with a substantial weight savings over the factory components on Mustangs with OE rear suspensions built specifically for drag racing.

Kit Features

- DynaPro four piston radial mount calipers attach directly to the OE suspension upright with billet radial mount-style brackets
- BP-20 compound *SmartPads* in the calipers provide fast response with strong holding power and resistance to fade on hard stops
- Dynamic mount drilled steel rotors maximize weight savings and resistance against thermal stress and rotor distortion
- Lightweight forged aluminum hats with high strength stainless bolts mount the rotors to the OE hubs
- Parking brakes deleted for more overall weight reduction
- All premium-grade, high-strength fasteners and hardware included
- Braided stainless steel DOT-type flexlines available separately for a complete custom installation

ORDERING INFORMATION: Rear Drag Kit for 2015-Present Ford Mustangs with 17" Wheels
