

MOUNTING BRACKET KIT FOR COMBINATION PROPORTIONING VALVE

Wilwood provides total flexibility with mount positioning of their Combination Proportioning Valve with the availability of both left and right hand mounting bracket kits. These bracket kits are designed to work in conjunction with Wilwood Aluminum Tandem Master Cylinders for a true engineered "Original Equipment" look.

Right Hand Installation Shown

Kit Features

- Left and right hand mounting bracket kits include bracket, fluid tubes, mounting hardware and spacers
- Stainless steel button head fasteners thread into the black e-coated bracket for years of durable, rust-free performance
- Simple bolt-on installation of Wilwood's Combination Proportioning Valve to their Tandem Master Cylinder
- Stainless steel fluid tubes are precision bent with preinstalled stainless tube nuts
- Compatible with either manual or power-assisted brake systems
- Specifically designed to work with Wilwood Aluminum Tandem Master Cylinders 260-8555, 260-8556, 260-9439, 260-12900 and 260-13375
