

Wilwood's Compact Remote Tandem Master Cylinders offer an expanded range of mounting options for hard-to-access or space-limited applications. Four bore size options, and the ability to feed the cylinders with either direct or remote mount fluid reservoirs, can accommodate a wide range of brake caliper combinations in either power or manually actuated systems.

Master Cylinder Kit Components

Master Cylinder Features

- High-pressure die cast aluminum, lightweight, high-strength body
- Compact design with 6.55" overall length from the mounting flange
- Full 1.12" stroke capacity with a 2:1 output volume ratio between the front and rear fluid circuits
- Dual outlets in each fluid circuit accommodate pressure output from either or both sides
- Available in 7/8", 15/16", 1" and 1-1/8" bore sizes
- 7/8" and 15/16" bore models include an integral pushrod for manual pedal applications
- 1" and 1-1/8" bore models can mount directly to power brake boosters or be used with a captured manual pushrod kit
- Slotted hole mount flanges will mount on pedals or boosters with bolt centers from 3.22" to 3.40"
- Choice of black e-coat or bright media burnished finish
- Kits include plastic reservoirs with brackets and hardware for direct or remote feed filling
- Billet aluminum reservoir kits and stainless braided flexlines optional

*PUSHROD INCLUDED WITH 7/8" AND 15/16" BORE SIZES ONLY
