ABYC SAFETY STANDARDS

Effective September 1, 1996, the American Boat and Yacht Council (ABYC) recommends that new seating standards go into effect. These standards help classify pedestal applications into separate categories.

CLASS A

Seat designed for occupancy while the boat is under way at any speed.

CLASS B

Seat designed for occupancy only at boat speeds not exceeding five miles per hour.

Within each of these classifications all pedestals must pass a series of tests (horizontal and vertical impacts, torque and static load tests). There are also two types of Class A seats.

CLASS A PASSENGER

Seat mount must resist 30 foot pounds of torque.

CLASS A DRIVER

Seat mount must incorporate a "mechanical interference lock" and resist 150 foot pounds of torque.

In an effort to help you understand how our product complies with the new regulations, we have assigned the following labels to identify them:

CLASS B

CLASS A PASSENGER

CLASS A DRIVER

Please look for these labels throughout the catalog.

Your New Seat Requires Routine Care

While the upholstery on your seat is made to withstand the effects of sun, heat, rain and soiling under normal conditions, it is important to care for your seat by keeping it clean. Keeping your seat covered will protect against UV degradation, leaf and pollen stains and dramatically reduce cleaning time. Camo printed vinyl is especially vulnerable to fading from excessive UV exposure. Use a cover that allows for ventilation, typical plastic bags and tarps that do not allow for ventilation may promote mold, mildew and pink staining of the vinyl on your seat and is **NOT COVERED UNDER YOUR WARRANTY.**

Harsh detergents, abrasives, bleach, solvents and suntan lotion can cause permanent damage to vinyl upholstery. Do not clean with power washers, they can generate 3500 psi and damage your upholstery. This damage is **NOT COVERED UNDER YOUR WARRANTY.**
