XIX EXOTIC ALLOYS IS AN INTERNATIONALLY KNOWN WHEEL ALLOY COMPANY FAMOUS FOR MANUFACTURING HIGH-END WHEELS SINCE 1990. THE OWNER OF THE COMPANY, WILLIAM LU, IS A TUV AND SFI WHEEL PROGRAM REPRESENTATIVE. XIX WHEELS ARE MADE BY THE HIGHEST STANDARDS AND BY THE BEST CERTIFIED MANUFACTURING PLANTS; THE PLANTS ARE TUV CERTIFIED AND FOLLOW THE STRICTEST GERMAN OEM MANUFACTURING STANDARDS. ALL XIX WHEELS ARE POWDER COATED WITH A 7 COAT PRE-TREATMENT STAGE AND 9 COAT FINISHING STAGE TO LAST AND APPEAR FLAWLESS EVEN WHEN EXPOSED TO THE MOST CRUEL ROAD CONDITIONS. IN COMPARISON, MOST OF THE AFTERMARKET WHEELS CURRENTLY SOLD IN THE UNITED STATES ARE COATED WITH AN INEXPENSIVE LACQUER PAINT TO CUT DOWN ON THE COST.

XIX WHEELS ARE HUB-CENTRIC AND LUG-CENTRIC TO PERFECTLY SUIT GERMAN VEHICLES, SUCH AS BMWs AND MERCEDES. THE OE CAPS MANUFACTURED BY BMW AND MERCEDES WILL FIT PERFECTLY IF THE OE LOOK IS DESIRED. OUR "DEEP-LIP" SERIES WHEELS OFFER A TRUE STAINLESS STEEL CHROME LIP AND AVAILABLE UP TO 5" IN DEPTH. OUR COMPETITORS USE A POLISHED STAINLESS LIP TO AGAIN CUT DOWN ON COST OF PRODUCTION. AS YOU MIGHT HAVE NOTICED BY READING THIS SO FAR, WE'RE EXTREMELY PROUD OF THE QUALITY OF OUR WHEELS.

XIX WHEELS

Flow Formed **XIX XF43**

Flow Forming is an incremental metal forming technique in which a disk or tube of metal is formed over a mandrel by one or more rollers using tremendous pressure. The final result is a wheel that's 30% stronger and 30% lighter than the traditional cast wheel.

SPORT
XIX WHEELS

Two-Piece Effect XIX X45

Most wheel manufacturers that venture into attempting to produce the 2-piece effect by inner-cutting the wheel focus on machining the face of the material along the casting of the inner barrel. What XIX focuses on is milling an additional 5mm + material off, a German OEM Manufacturing Standard, and making sure that the step is highly visible. The X45 comes with replaceable bolt-on rivets.
