

XIX EXOTIC ALLOYS IS AN INTERNATIONALLY KNOWN WHEEL ALLOY COMPANY FAMOUS FOR MANUFACTURING HIGH END WHEELS SINCE 1990. THE OWNER OF THE COMPANY, WILLIAM LU, IS A TUV AND SFI WHEEL PROGRAM REPRESENTATIVE. XIX WHEELS ARE MADE BY THE HIGHEST STANDARDS AND BY THE BEST CERTIFIED MANUFACTURING PLANTS; THE PLANTS ARE TUV CERTIFIED AND FOLLOW THE STRICTEST GERMAN OEM MANUFACTURING STANDARD.

ALL XIX WHEELS ARE POWDER COATED WITH A 7 COAT PRE-TREATMENT STAGE AND 9 COAT FINISHING STAGE TO LAST AND APPEAR FLAWLESS EVEN WHEN EXPOSED TO THE MOST CRUEL ROAD CONDITIONS; IN COMPARISON, MOST OF THE AFTERMARKET WHEELS CURRENTLY SOLD IN THE UNITED STATES ARE COATED WITH AN INEXPENSIVE LACQUER PAINT TO CUT DOWN ON THE COST.

XIX WHEELS ARE HUB-CENTRIC AND LUG-CENTRIC TO PERFECTLY SUIT GERMAN VEHICLES, SUCH AS BMW'S AND MERCEDES; THE OE CAPS MANUFACTURED BY BMW AND MERCEDES WILL FIT PERFECTLY IF THE OE LOOK IS DESIRED.

XIX "DEEP-LIP" SERIES WHEELS OFFER A TRUE STAINLESS STEEL CHROME LIP AND AVAILABLE UP TO 5" IN DEPTH; OUR COMPETITORS USE A POLISHED STAINLESS LIP TO AGAIN CUT DOWN ON COST OF PRODUCTION. AS YOU MIGHT HAVE NOTICED BY READING THIS SO FAR, WE'RE EXTREMELY PROUD OF THE QUALITY OF XIX WHEELS.
