

Warranty and Disclaimer

All XK Glow mounting brackets come with a Limited Lifetime structural warranty to the original purchaser. Within One year after the purchase date, the original buyer may return any XKGLOW products that have any finish imperfections due to a defect in materials or workmanship. Finish imperfections from impacts to the piece such as rock chips or abrasions will not be considered defective. Installation of this product must be performed by a licensed professional. Should the failure of the product be the result of damage occurring as a result of improper installation, alteration of the product or an act or omission on the part of the consumer, this warranty is void. XKGLOW Lighting shall not be responsible for any consequential damages which arise from the use and/or installation of the product. If the kit is installed in any manner other than specified, XKGLOW Lighting reserves the right to deny any warranty claims at the discretion of the technical support department. Any product return must include the original packaging, invoice number and a statement of the alleged defect. Upon receipt of the returned product, the company will test the product for defect. If the results of the testing do not support the warranty claim, do not reveal any defect or indicate consumer negligence in the installation and handling of the product, then the product will be returned to you and you will be charged a reshipping fee. If the product is returned from an address within the continental United States, within the first 30 days after purchase, and is found to be defective, XKGLOW Lighting will exchange or refund the original purchase expense. This offer does not extend to the cost for shipping charges on any international packages.

Additional Disclaimer Terms

- Please check your local and state laws for the proper use of this product.
- Improper installation of electrical products such as lighting may cause damage to any vehicle or device to which the improperly handled or installed lighting is attached.
 - Improperly installed product may cause injury to persons.
 - It is recommended that the kit should be installed by a licensed professional.
 - XKGLOW assumes no liability for the installation of the product.
 - Warranty or liability will not exceed the product purchase price, which shall be buyer's sole and exclusive remedy.

Installation Instructions

1. Removing Factory Hardware and Installing the Mounts

This installation will start with the Jeep brand tool set that was included with your JL/JT at purchase. Using the included torx head bit remove the 4 fasteners on the cowl section from both sides of the vehicle pointed out in **Example 1**. Once removed this would be the time to route your wiring down the A pillar as the mount will cover it once installed. Once all wiring is in place the XK Glow A-pillar mount on the vehicle and install the included stainless steel fasteners as shown in **Example 2**. The shorter M8 bolts will go into the side locations and the longer M6 bolts will go in the top.

Example 1

Example 2

2. Mounting of Lightbars

These mounts are designed to hold a 52" light bar using only the included mounting hardware that is included with most light bars. Mounting of a 50" light bar can be achieved with the use of two 1" urethane spacers that are available at any hardware store. The light bar attachment area allows for the light bar to be positioned up and down as well as in and out. This adjustability allows for a light bar that fits tightly to the body, to reduce wind noise. The finished product will look like the setup shown in **Example 3**.

NOTE: Double check clearance of windshield wipers to the light bar before finalizing placement.
