# YAKIMA SmarT-Slot Kit 2

CONTENTS

4x

4x

For use with Yakima FatCat snow mounts.

1 Remove the clamps from each mount.

4X

2 Remove an endcap from each bar.

2X

3 Slide two t-bolts into the slot on each crossbar. Match the distance between mounting holes on your FatCat.

Note: Kit works at both mounting positions on FatCat Evo 6.

4X

4 Install the Low Rise blocks onto the t-bolts. Be sure to orient the blocks as pictured below.

4X

5

Place the mounts onto the blocks.

2X

6

Install the washers and knobs. Tighten the knobs down until you achieve resistance of 65N (15 lb) when closing the levers.

65N (15 lb)

2X

Check that the mounts are secure. Repeat step 6 if there is movement. Read and adhere to all warnings and cautions in your FatCat instructions.

8

Reinstall the endcaps.

We offer roof racks that are tested to the limit and beyond.
