

ZIRUTMAT, ZIGUMP, ZIRXTS, ZIR9D, ZIR7

UltraMat performance packs are designed to save you time and money by getting you the correct amount of UltraMat each and everytime. UltraMat reduces road noise while reflecting heat at the same time. The Micro-Ceramic & InfraRed Reflectant Resin compounds utilize the dynamics of thermal radiance in your favor to reflect infrared energy, keeping you warmer in the winter and cooler in the summer. The AirGap™ deadens sound vibrations for a much more relaxing ride that's easier on the ears too!

Squares: Each square is around 12" x 12" (30cm x 30cm) and are ideal for hard to reach areas like doors, floor boards, trunks, inside roofs, and much more! Can be layered for extra performance.

Rolls: Each roll is around 5.9' x 3.9' (1.8m x 1.2m). 1 roll can cover 2 doors or 1 floor pan. 3 rolls can complete a car (most models).

INSTALLATION

- 1 Cut UltraMat to fit - use squares for smaller areas or hard to reach areas
- 2 Use one of the methods below to directly mount your UltraMat to any surface:
 - a.) Spray on adhesive (not included)
 - b.) Tape edges (not included)
 - c.) Snug fit

*Do not install in engine compartment

**NOTE: Our Heat & Sound Deadener kits are designed to include enough material to complete your installation. In some cases, you may be left with extra material.
